Project :

Employee management system(Using Tkinter-Python & Mysql)

The project was based management of the data used to store employee various information about the clients who wants to give details . In this project for frontend I.e GUI ,I used tkinter module from python it is one of the predefined module and for backend I had used MYSQL workbench.

Tic Tac Toe Game Using python

The project was a game made by me, in this game I had used python it is a multi player game which is also called as X O. I had used tkinter module for GUI and random module for computer choice, user choice is made by the client and my project also maintain score.

Rock paper scissor game using python

The project was a game made by me, in this game I had used python it is a multi player game I had used tkinter module for GUI it basically has image for stone paper and scissor after clicking on that image choice is made. same project I have made without using gui in which user made choice manually.
